With increasing cybercrimes there is a need to create a safe space for every organization. **METMOX** is an ISO certified prominent business in cybersecurity with functional operation centers. We take out the complexity in strengthening your daily security and network operations. **Metmox MSS** provides a 24\*7 SOC without an organization having built and staff one themselves.

### Our Vision

Metmox is a strategy-focused organization with valued customers and esteemed employees operating as one. We are known for being the customer's most trusted partner and integral in their success.

### Our People

Over **200+** security specialists who are CEH certified are working towards perfection nurturing our services. **METMOX** becomes the world's biggest security provider while creating new landmarks in threat hunting technologies and thereby making your operations intact.

We strive to be the **best and simple** – Our SMEs develop methodologies and new technologies for varied range of services in the cybersecurity industry. We set high standards for our competitors. We deliver results, win and celebrate together.

### Our Technology

We deliver multi-dimensional analysis capabilities and advance analytics expert services. This means we use the tools our customers have already invested in to help them get the value and early return on investment. Our extensive intelligence partner network helps us to recommend additional domain knowledge, technology and tools to improve our customer's overall security posture. Our recommendations are based on decades of Cyber Security Expertise and help achieve customers continuous protection in a rapidly changing world of threat.
